

Agent Criteria

The Digital Property Group is committed to attracting a high quality audience for our member agents and we therefore need to ensure that our users have a first class experience when using our sites. In order to achieve this we have put some criteria in place for our agents to fulfil in order to be eligible to advertise on our sites.

The criteria are as follows:

1. Operate within the traditional estate & letting agency model

- The agent must conduct viewings and valuations in **all** of its offers/packages
- The agent must only list properties that it is instructed to sell or let
- The agent must negotiate on behalf of the vendor or landlord

2. Run a professional established business

- The agent must have a physical business address – PO Boxes are not accepted*
- If a physical business address is not available, the agent must be registered with Companies House for at least 18 month and be a Ltd company*
- The agent must have a company logo
- The agent must have a landline or a mobile number**

3. Where agents do not fulfil above criteria

Agents are able to advertise on the sites if they are a member of an estate agent governing body***, as mentioned below:

- ARLA
- NAEA
- NALS
- OEA
- Guild of Letting & Management

Common reasons why agents do not meet our criteria

- The agent has false or misleading properties
- The agent has outdated property stock that is not listed as 'sold' or 'let'
- The agent does not conduct viewings or valuations
- The agent is a property search agent. We do not allow this business model on our sites

Criteria Checklist

The checklist has been created to ensure that all estate and letting agents meet the criteria put in place by The Digital Property Group.
